

CS4500 Software Development

Final Deliverables Team 24

Overall Feedback

Lacked analysis of situations or actual experience; meets basic expectations. Solid work.

Comments on the System Setup Video

Showed checking out code; setting up db credentials and starting the webapp on AWS.

Comments on the System Demo Video

started with user creation and covered all the features

Comments on the Problem Overview

Briefly explained what the requirements and the reason for developing the product

Comments on Result Overview

Could have explained more. Instead of talking about Jira tickets, the document should cover in plain English which features were completed and what they were not able to complete

Comments on Result Overview

Explained the process well.

Comments on the Retrospective

They acknowledge that the project showed how the challenges will be on the floor.

Comments on use cases

As Expected

Comments on UML diagrams

The complete product is covered in the use cases.

Comments on live system

Could have worked towards a cleaner UI; the UI is a bit messy, but covers all the features.
